

COMPANY PROFILE

it Consult is Organization Intelligence.

The organization

it Consult is the leading software house for the Microsoft environment in services and software platform development for Organization Intelligence, i.e. **Business Process, Workflow, Document and Knowledge Management** and for areas like legal **Case Management, Document Archiving and Substitutive Conservation**.

Since 2001 the company has concentrated on the processing of destructured data (documents, e-mail, multimedia files, processes, etc.) and it has succeeded in reaching a leadership position in Italy in these areas thanks to various factors:

- An original approach to organizational knowledge management and a method for applying it
- A solid partnership with Microsoft for which it is the **ISV partner of reference in Italy for SharePoint**
- Production of standard software platforms for the management of destructured data

As concerns this last point, It Consult is present on the market with various standard solutions developed entirely and natively on Microsoft SharePoint.

Organization Intelligence. The techniques for capturing, modeling, developing the intelligence of each organization, using **processes** that govern it, individual and collective **competences** necessary for executing it and the **content** that constitute the output.

it Consult is
the company
that
produces
josh: the
leading
software
in Italy for
the process,
competence
and content
management

SOLUTIONS

Increasing the value of organization intelligence thanks to the management of Processes, Competences and Contents.

The solutions are marked by great facility of use aimed at making users and organizations independent in the management and use of the functions;

- **josh** - software platform for Organization Intelligence, Business Process and Knowledge Management based on market standards
- **josh Archive!** - a solution that provides functions for document filing and legally compliant substitutive conservation
- **josh Protocol!** - legally compliant case management platform.

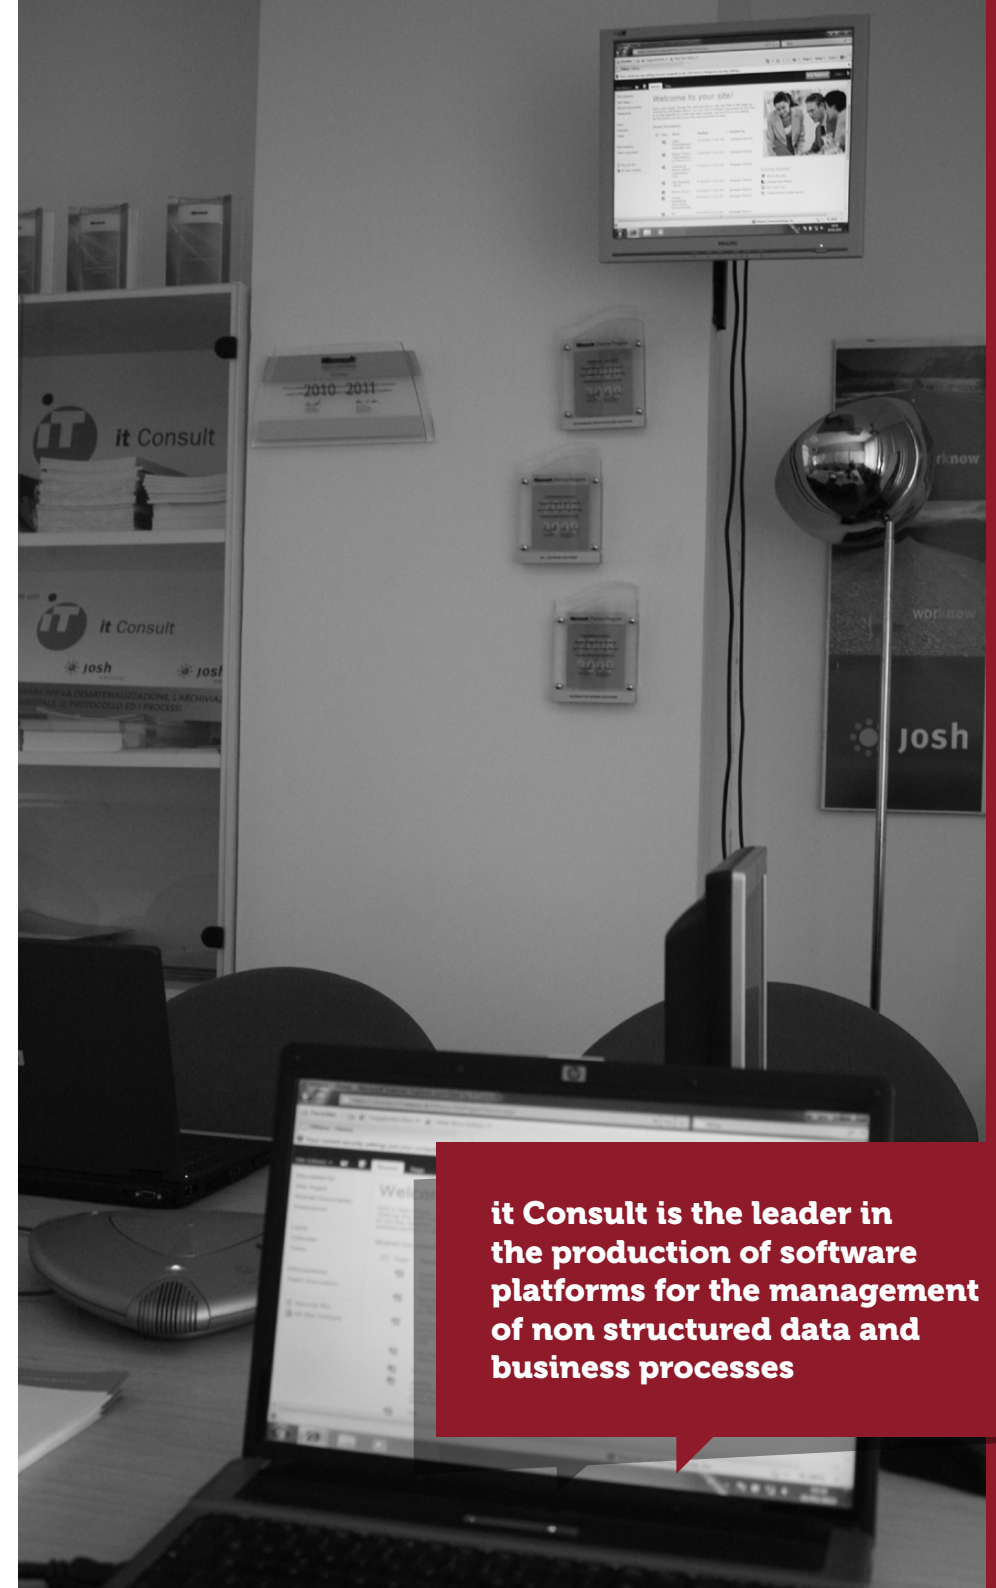

All of these products have been completely developed and integrated with the entire Microsoft technological infrastructure (Windows Server, Sql Server, SharePoint, Lync, Exchange, etc.) and are internationally certified by third party bodies with respect to Microsoft, namely:

- Web Services and .Net
- SQL Server
- Server Operating Systems (Windows Server)
- Client Operating Systems (Windows XP, Windows Vista, Windows 7, Windows 8)

A solution for various corporate functions.

The suite of products offered by it Consult meets the need for management and control in various areas, for example:

- Compliance & Risk Management (Audit, Governance ...)
- Customer Service (customer relations management, product development, trouble ticketing, service SLA definition/control)
- Finance Activities (investment authorization, budget control, cash flow management, invoice approval)
- Human Resources (onboarding, skill management.)
- Regulatory and quality adjustments (SOX, ISO, Protocollo)
- Dematerialization (active/passive cycle, Substitutive Conservation)
- Security (data control, monitoring, data source integration)

it Consult is the leader in the production of software platforms for the management of non structured data and business processes

josh makes it possible to identify and call into play all of the actors that work together for the success of business processes, thus guaranteeing strong compliance with internal procedures.
