it Consult with Kodak at OMAT 2012

it Consult is at the Kodak stand at OMAT 2012 to present its software solutions for dematerialization, document management and process automation

Urbino, November 9, 2012 - **it Consult**, Microsoft reference partner for dematerialization, document archiving, Cnipa/DigitPA compliant case management, workflow and process management will be at centre stage at the next OMAT 2012 in Roma with a dedicated area at the Kodak stand.

it Consult will present its strategy for supporting enterprises and public administrations through its highly innovative market standard software solutions based on Microsoft SharePoint 2010 and integrated with Kodak devices.

In particular, they will be presenting **josh**, an Organization Intelligence and Business Process Management platform, **josh Protocol!**, the system that guarantees functionality for case management, document management, authorization workflows and business process re-engineering and which allows the centralization of functions related to advanced document management, scanning, digital signature and process management in the context of registration, as well as **josh Archive!** for document archiving and substitutive conservation.

it Consult
